

C3600 CARGO PARACHUTE ASSEMBLY

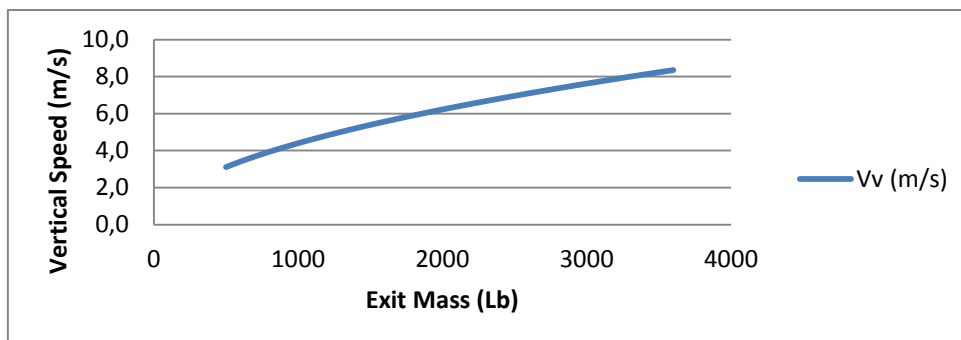

The **C3600 Cargo Parachute Assembly** is the new generation round cargo aerial delivery system capable of supporting and delivering between 500 lb to 3600 lb in a single configuration only.

The C3600 Cargo Parachute Assembly consists on a flat circular 65-foot nominal diameter canopy built in 60 gores of 0.5-3 CFM rip-stop, Dacron independent suspension lines and slider, which makes a neat and tidy deployment.

The deployment bag, manufactured in a combination of Nylon and Cotton gives it the necessary strength and durability as well as provides the protection to high friction. It includes an improved stowage and protection system for the suspension lines. The removable 15-foot static line includes the new generation snap hook P/N 11-1-6991.

Vertical Speed Graph

C3600 Cargo Parachute Assembly	
Maximum Load	3600 lbs
Minimum Load	500 lbs
Assy. Weight	80 lbs
Dimension Assy. (Length x Width x Height)	75 x 52 x 29 cm
D-Bag Fabric	Nylon & Cotton
Canopy Shape	Flat Circular
Canopy Fabric	0.5-3 CFM
Diameter	65 ft
Nº of Gores	60
Nº Suspension Lines	60
Suspension Lines Material	Dacron 700 lb
Suspension Lines Length	59 ft
Nº of Risers	2
Risers Webbing	Nylon
Static Line Length	15 ft
Static Line Webbing	Nylon
Parachute Deployment	Static Line & Slider
