

VECTRA (7-CELL LIGHTLY TAPERED)

Vectra is the latest generation of 7 cell zp lightly tapered canopies designed to match the specifications of an all-around pilot. Its advanced design provides some of the largest flight envelopes available today for easy enjoyment at all levels of expertise.

Predictable, soft, always on heading openings are appreciated characteristics of this canopy.

Its light feeling on the toggles makes of it a deliciously fun canopy to fly and still be as forgiving as to make the inexperienced pilot feel safe under it.

High wing loadings will make Vectra a bit faster and more aggressive in feel but will still maintain its great ease of landing and forgiveness.

Like all sports canopies manufactured by CIMSA Ingeniería de Sistemas, Vectra is available in any size, although its optimum range falls between 110 and 180 sq.ft.

Model	P/N	Size (Sq.Ft.)	MSW (Lbs)	Weight (Lbs)
VECTRA-100	317551-100	100	140	3.0
VECTRA-110	317551-110	110	154	3.0
VECTRA-120	317551-120	120	168	3.0
VECTRA-130	317551-130	130	182	3.5
VECTRA-140	317551-140	140	196	3.5
VECTRA-150	317551-150	150	210	3.5
VECTRA-160	317551-160	160	224	4.0
VECTRA-170	317551-170	170	238	4.0
VECTRA-180	317551-180	180	252	4.0
VECTRA-190	317551-190	190	266	4.5
VECTRA-200	317551-200	200	280	4.5
